## QUALIFICATIONS

Usage of HTML5, CSS3/SASS, JavaScript e jQuery to build simple and complex applications.

Proficiency at React.js to build dynamic single page applications.

Use of PHP and MySQL for the code of the backend of high complexity applications.

Implementation of APIs in a variety of ways.

Proficiency at Git for the source control and deploying my applications to GitHub.

## EDUCATION

The starting of my web development learning cycle has been with HTML5 and CSS3, as well with JavaScript to build simple web applications.

With time I've started to build with PHP and MySQL for the backend of more complex applications. Together with those two, I learned jQuery to boost my coding with JavaScript.

After that I started using ReactJS to keep up with the industry standards and using GIT for the source control of my projects, while learning how to build REST APIs with NodeJS, MongoDB and Express .

## PROJECTS

**My website portfolio** - <https://felbenini.vercel.app/>

Built with React, SASS and TypeScript, this website was made to show my skills at coding, introduce myself and display my portfolio. There you can see all my projects and web development skills!

**CryptoTracker** - <https://crypto-tracker-fb.vercel.app/>

A crypto currency tracker built with React, coingecko's API and plenty of other dependencies.

**QR Code Generator** - <https://liveqr-code-generator.netlify.app/>

Made with HTML5, CSS3 and jQuery, this website generates QR Codes in various sizes.

## Coding and Development skills

- PHP: Hypertext Preprocessor
- JavaScript
- HTML5 and CSS3/SASS
- jQuery
- React.js
- MySQL
- Git
- NodeJS
- Express
- MongoDB

## Soft Skills

- Fast learner
- Self driven
- Teamworker
- Empathy
- Critical thinking
- Positive attitude

## Languages

- English - Fluency
- Portuguese - Mother tongue
